WHY USE STONE AGE OUTDOOR FIREPLACE KITS?

STONE AGE OUTDOOR

WHY USE AN OUTDOOR FIREPLACE KIT:

Outdoor Fireplace Kits make installing an outdoor fireplace faster and easier. Instead of spending hours or even days constructing the framework of an outdoor fireplace from scratch out of blocks, Stone Age Manufacturing kits arrive on a compact pallet and assemble in just 3-4 hours with the labor of only two people.

CUSTOMIZABLE

Adjust the height of your fireplace in a variety of ways or add wood storage boxes

- Install a custom base or hearth to the height you want. Use natural stone or other materials (risers and hearth included in Standard Series)
- Use a firebox extension to increase the height of your firebox
- Add flue extensions to reach desired height (check local codes for max height)
- Install a metal or stone chimney cap to finish the fireplace

Customize fireplace kits with accessories to reach the height you want.

BENEFITS OF STONE AGE OUTDOOR FIREPLACE KITS

QUICK & EASY INSTALLATION

Once your concrete footing is ready, Stone Age kits require only 2 people to install in 3-4 hours and can be veneered the same day.

QUALITY CONSTRUCTION

Stone Age kits are solid construction, not hollow and are made from refractory cement reinforced with rebar.

PROPER DRAFT

Design takes the guesswork out of creating a proper draft and great fires. Larger flue keeps smoke flowing upward and not out of the front of the fireplace.

TRADITIONAL OUTDOOR FIREPLACE KITS

Contractor & Standard

The Contractor Series offers Stone Age design and materials distilled down to its essential components of fireplace and chimney. Customize height with additional options such as firebox and flue extensions.

The Standard Series includes the Contractor base kit, plus firebrick, an additional flue extension, 18" risers, and hearth.

Contractor Base Kit

Standard Fireplace Series

CONTRACTOR FIREPLACE KIT *Includes base kit, plus 3 flue extensions (6" each)*

STANDARD FIREPLACE KIT *Includes base kit, plus 4 flue extensions (6" each), firebrick, 18" risers and hearth.*

NEW AGE FIREPLACE SERIES

Why Choose a Zero-Clearance Fireplace Kit

STONE AGE OUTDOOR

INDOOR/OUTDOOR

New Age fireplace kits are UL-127/ULC-S610 Certified for outdoor or indoor applications, and ICC-ES AC156 Certified for Seismic Resistance. Use vented gas logs or wood burning.

MODERN LOOK

The flat top design of New Age Fireplace kits, not only gives a modern look, but also makes for easy construction and mounting televisions above fireplaces.

PAVILIONS AND PERGOLAS

The Zero Clearance rating for New Age kits means you can build directly onto the base kit, which means they build seamlessly and safely into backyard pavilions and pergolas.

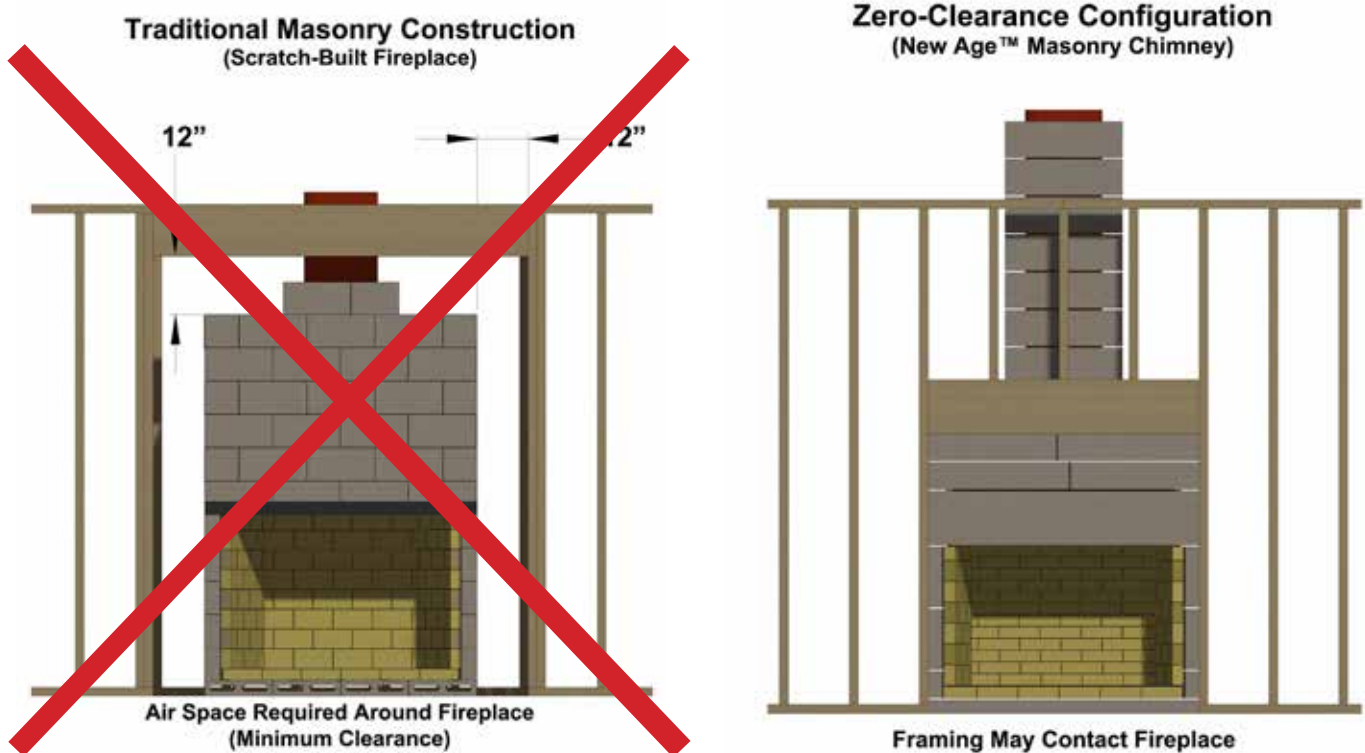

NEW AGE FIREPLACE SERIES

Benefits of Fireplace Kits

ZERO CLEARANCE

The design of New Age masonry chimneys incorporates the necessary “air gap” making it possible for framing to be in contact with the fireplace. A clay flue sits separately inside concrete outer blocks giving the fireplace its Zero Clearance rating.

QUICK & EASY INSTALLATION

Once your concrete footing is ready, New Age kits require only 2 people to install in 3-4 hours and can be veneered the same day.

INDOOR/OUTDOOR FIREPLACE KITS

New Age Zero Clearance

New Age fireplace kits are rated Zero-Clearance, meaning you can safely build right up to the chimney, which makes it great for mounting TVs. New Age kits can be installed using masonry chimneys or metal pipe, in both indoor and outdoor applications

NEW AGE FIREPLACE SERIES

Chimney Construction

MASONRY CHIMNEY

New Age™ kits are available in all-masonry, zero clearance configurations, where structural framing may be placed in direct contact with the kit and its masonry chimney. A separate clay flue sits within the concrete outdoor block to create an “air gap” necessary for Zero Clearance applications. Larger fireplaces (60”, 72”) require double chimneys.

STONE AGE OUTDOOR

Air Gap

8" Flue Extension Outer Blocks

Add 1 bucket of mortar per
8 additional flue extensions.

Clay Flue

Item #	Description	Retail
SA-2323-8	23" x 23" x 8" Outer Block (for 60"*)	\$137
SA-FL1313*	13" x 13" x 24" Clay Flue (for 60"*)	\$72
SA-2226-8	22" x 26" x 8" Outer Block (for 42", 48", 72"*)	\$144
SA-FL1317*	13" x 17" x 24" Clay Flue (for 42", 48", 72"*)	\$118

*60" and 72" New Age models require a double chimney stack.

METAL CHIMNEY

New Age™ kits may be used with 14" or 16" UL-103 metal chimney. However, please note that unlike our masonry flue, the metal chimney will need a 2" clearance from combustibles. Metal chimney is ideal in situations where total weight could become an issue and is around ten times faster to install vs. a masonry flue. Larger fireplaces (60", 72") require double chimney.

Chimney Adaptor

For Metal Chimney
flue installations
14" or 16"

New Age 42" = 16" Diameter
New Age 48" = 16" Diameter
New Age 60" = 14" Diameter x 2
New Age 72" = 16" Diameter x 2

See page 11 for metal chimney components and pricing.
