Hargrove recommends using between 2"-4" depth of glass on their burner kits. 1 lb of Fireglass and Firebeads cover approximately 20 cubic inches. To determine how much glass is necessary, determine the volume of the area you would like to fill. Formula: Fireplace Width X Fireplace Depth X Glass Depth

Vent-Free & Vented Dual Rated Gas Logs

Superior Gas Logs elevate the traditional log and fire presentation to a much higher level. The combination of authentic looking hand -painted logs with a massive fire and ember bed allows you to have it all. Superior vent-free gas logs are 99% heat efficient, operate during a power outage and can be used in a vented application as well (optional damper clamped required).
